PROFESSIONAL SUMMARY

Java-focused engineer with 7+ months of professional experience at Infosys in Java-based API automation, REST APIs, SQL validation, and Agile development. Strong foundation in Core Java, OOP, Collections, Exception Handling, and RESTful services, with hands-on project experience in Spring Boot, Spring MVC, Spring Data JPA, Hibernate, Spring Security, JWT, Microservices, PostgreSQL, and AI API integration. Experienced with JUnit, Mockito, Maven, Git, and Docker.

TECHNICAL SKILLS

Languages: Java 17 · Core Java · OOP · Collections · Exception Handling
Spring: Spring Boot · Spring MVC · Spring Data JPA · Hibernate · Spring Security · JWT
Backend: REST APIs · Microservices · DTO · Dependency Injection · Global Exception Handling
Database: PostgreSQL · MySQL · Oracle · SQL · Joins · JPQL
Testing/Tools: JUnit 5 · Mockito · Rest Assured · Maven · Git · GitHub · Docker · Jenkins · Postman
AI: Spring AI · OpenAI API · Prompt Engineering · AI-based Text Classification

PROFESSIONAL EXPERIENCE

Systems Engineer – QA Automation, Infosys Limited

Sep 2025 – Apr 2026

Bangalore, India

- Developed and maintained Java-based REST API automation solutions, validating request/response payloads, status codes, headers, authentication, and business rules.
- Designed and executed 150+ REST API automated test cases using Java and Rest Assured, achieving 90%+ API coverage and identifying 25+ critical pre-production defects.
- Performed SQL-based backend validation across 20+ database tables, verifying API responses against persisted application data.
- Built a scalable Java Selenium automation framework using Page Object Model, TestNG, and Maven, reducing manual testing effort by 45%.
- Integrated automated test suites with Jenkins CI/CD and used Git for source-code management while collaborating in Agile/Scrum teams.
- Analyzed application failures, performed root-cause investigation, and collaborated with development teams to troubleshoot defects and improve application quality.

KEY PROJECT

AI-Powered Healthcare Service Management Platform

Java 17 · Spring Boot · Spring MVC · JPA/Hibernate · Spring Security · JWT · PostgreSQL · Microservices · Spring AI · OpenAI API · JUnit · Mockito · Maven · Docker

- Designed a microservices-based healthcare platform using Spring Boot with separate Patient, Appointment, Notification, and AI Assistant services.
- Developed 25+ RESTful APIs for patient management, doctor management, appointment scheduling, authentication, and service-request processing.
- Implemented Spring Data JPA/Hibernate with PostgreSQL, including entity relationships, pagination, sorting, and custom JPQL queries.
- Secured APIs using Spring Security and JWT with role-based authorization for ADMIN, DOCTOR, and PATIENT users; added DTO validation and centralized exception handling.
- Integrated Spring AI with the OpenAI API to classify service requests and generate AI-assisted responses, with JUnit/Mockito tests for core business logic.

REST API Automation & Database Validation Framework

Java · Rest Assured · TestNG · SQL · Cucumber · Maven

- Built reusable REST API automation for CRUD operations, authentication, response validation, and database-backed transactions.
- Implemented data-driven testing and SQL validation to verify consistency between REST API responses and backend database records.

EDUCATION

B.E. – Electronics & Communication Engineering

CGPA: 8.16/10

Sant Longowal Institute of Engineering & Technology (SLIET), Punjab

2021 – 2025

ACHIEVEMENTS & CERTIFICATIONS

- SDET Bootcamp Certified · Core Java Certified · 45% reduction in manual testing effort at Infosys.
